- Python — 70%
- Lua — 70%

IVAN HORAK
BSc IKS Student

About Me

My personal goals and aspirations are to become a DevOps engineer working internationally and to hopefully one day start my own software engineering company using not only the skills that I have acquired through studying Information and Knowledge systems but also the skills that I have cultivated through my own personal projects.

Experience

Nespresso Menlyn Retail

Sales Assistan

2021 - 2022

I worked as a sales assitant selling coffee, coffee machines and other Nespresso products.

Traits and Interests

I am a hard worker with a strong mindset, that has the determination to constantly improve upon my skills.

I also have great communication skills which I learnt from being a sales assistant and from taking an extra course in English and public speaking.

In my free time I constantly work on my Linux (I use Arch BTW) and Neovim configs and love to experiment with my system and development environment.
